Flocking Home – Game Instruction Document

In Flocking Home, you will be guiding a flock of birds across its flight with your help and the lead bird. With 15 birds in the sky, hawks will take their chances to capture one at a time. Your goal, take them all alive to the nest at the end of the game. Or at least 40% of them. And, don't let the hawks capture the lead bird.

In this game, you will be controlling the lead bird. Its design can be seen on the sprite sheet below. Using up and down arrows on your keyboard, you will control the lead bird that would be followed by the follower birds in a staggered movement. This might make it hard for you to avoid a collision with each hawk flying either horizontal or diagonally towards the birds at different speeds.

You'll win when the flock reaches the nest with > 40% of the survival rate and the leader bird did not collide with a hawk.

You lose right away if a hawk collides with the lead bird and if the flock goes down to 0 follower birds before you even reach the nest.

For the controls:

Up arrow: The key to move the lead bird up
Down arrow: The key to move the lead bird down
